Stamp 1G · Full working rights, Ireland · No sponsorship required · Available immediately

## PROFESSIONAL SUMMARY

Data Engineer and Analyst with **nearly 2 years of industry experience** delivering end-to-end cloud data platforms, AI-powered analytics, and executive BI dashboards for enterprise BFSI and Healthcare clients. Proven ability to deploy production-grade solutions across the full modern data stack — Azure, Snowflake, dbt, Airflow, Databricks, LangChain, and Power BI. Reduced SQL query runtime by **78%** across 1.4M+ records and eliminated **25%** of manual reporting effort at MethodHub Software. MSc Data and Computational Science, University College Dublin (Dec 2025). Full working rights in Ireland — Stamp 1G, available immediately.

## LIVE PROJECTS

## TECHNICAL SKILLS

**Data Engineering** Snowflake · dbt Core · Apache Airflow · Databricks · Azure Blob Storage · PySpark · Docker · GitHub Actions CI/CD · Medallion Architecture · ETL/ELT · Data Warehousing · Data Modelling

**Programming** Python (Pandas, NumPy, PySpark, Scikit-learn) · SQL (CTEs, Window Functions, Stored Procedures, Query Optimisation) · T-SQL

**AI & LLMs** LangChain · Groq LLaMA 3.3 70B · Gemini 1.5 Flash · RAG · Pinecone · HuggingFace · PyTorch · TensorFlow · NLP · Generative AI

**BI & Visualisation** Power BI (DAX, CALCULATE, Power Query, Time Intelligence) · Star Schema · Streamlit · Tableau · Excel (Advanced, VBA)

**Cloud & Databases** Snowflake · Azure · Databricks · AWS S3 · Google BigQuery · MySQL · PostgreSQL · SQL Server (T-SQL)

**Business Analysis** Requirements Gathering · Stakeholder Management · Agile/Scrum · Jira · Data Governance · KPI · Process Documentation

## WORK EXPERIENCE

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |                            |

## KEY PROJECTS

SaaS Revenue Intelligence Platform

Live App ↗ GitHub ↗

Azure · Snowflake · dbt Core · Apache Airflow · Databricks · PySpark · LangChain · Groq LLaMA 3.3 70B · Streamlit · Docker · GitHub Actions

- Architected full medallion pipeline: **Azure Blob** → **Snowflake** → **dbt (5 GOLD models, 14 tests)** → **11-page Streamlit app** tracking MRR, ARR, Churn, NRR, LTV, CAC, Quick Ratio, and Rule of 40
- Built **AI SQL agent** with LangChain + Groq LLaMA 3.3 70B — business users query Snowflake in plain English, zero SQL required from end users
- Nightly **Airflow DAG** (02:00 UTC) with idempotent loads, exponential backoff retry, and Slack alerts; **Databricks PySpark** notebook for cohort retention, churn, and LTV analysis

AI Medical Report Analyser — RAG-Powered Clinical Assistant

Live App ↗ GitHub ↗

Python · LangChain · Pinecone · Gemini 1.5 Flash · HuggingFace MiniLM · RAG · Streamlit · Docker · GitHub Actions

- Dual Pinecone index architecture** (GENERAL\_INDEX + PATIENT\_INDEX) with strict session isolation — MMR retrieval (k=10, λ=0.35) minimises redundant chunks
- Gemini 1.5 Flash at **temperature=0.2** with grounding prompts — built evaluation framework tracking faithfulness, hallucination rate, grounding rate, and latency per session

Business Insights 360 — Enterprise BI Dashboard

Live Dashboard ↗ GitHub ↗

Power BI · DAX · Star Schema · MySQL · Power Query · Excel

- Star schema: **fact\_sales\_monthly** + **fact\_forecast\_monthly** + **4 dimension tables**; DAX measures — GM%, Net Profit%, Forecast Accuracy%, Net Error
- 6 interactive views** (Finance P&L, Sales, Marketing, Supply Chain, Executive, Home) consolidating **500,000+ records** into a single live Power BI Service dashboard

EDUCATION

MSc Data and Computational Science

Sep 2024 – Dec 2025

University College Dublin, Ireland

Grade: **2:1** · Machine Learning · Data Engineering · Statistical Analysis · Applied Probability · AI & Deep Learning · Computational Science

BTech Computer Science (Data Science)

Aug 2020 – Jun 2024

Dr. M.G.R. University, Chennai, India

CGPA: **8.2/10** · Awarded **Overall Best Project & Overall Best Student**

CERTIFICATIONS

Google Data Analytics Professional Certificate · Google / Coursera **Verify** ↗

IBM Business Intelligence Certificate · IBM Career Education Program **Verify** ↗

IBM Big Data Engineer Certificate · IBM Career Education Program **Verify** ↗

Codebasics Data Analytics Bootcamp 4.0 **Verify** ↗

ADDITIONAL

**GDSC (Google Developer Student Clubs):** Led Python, data engineering, and AI workshops for 200+ students — strong technical communicator and presenter

**Student Leader, College Forum:** Organised and delivered events for 4,000+ participants

**State-Level Basketball Champion:** Teamwork and resilience under competitive pressure
