Stamp 1G visa — Eligible and immediately available to work in Ireland

Professional Summary

Data & Business Analyst with 1.5+ years of experience delivering business intelligence solutions across finance, compliance, and operations. Designed KPI dashboards in Power BI across 4+ business units, optimised SQL query execution time by 75% (7 seconds to 1.9 seconds) across 1.4M+ records, and automated ETL reporting workflows reducing manual effort by 30%. Strong track record in data storytelling, ad-hoc reporting, and translating complex datasets into actionable business insights. MSc in Data and Computational Science from University College Dublin. Immediately available on Stamp 1G visa.

Technical Skills

Programming Languages: SQL (MySQL, SQL Server), Python (Pandas, NumPy)

BI and Visualisation: Power BI (DAX, CALCULATE, Time Intelligence, Power Query), Tableau, Excel (Advanced, Pivot Tables)

Data and Analytics: Data Modelling (Star Schema), ETL, Data Cleaning, Data Validation, Statistical Analysis, KPI Reporting, Ad-hoc Reporting, Trend Analysis, Data Visualisation, Business Intelligence

Cloud and Platforms: Azure (Azure SQL, Power BI Service), Google BigQuery, AWS (S3), Snowflake

Tools and Workflow: Jira, Agile, Requirements Gathering, Stakeholder Management, Data Storytelling, Cross-functional Collaboration

Professional Experience

Data Analyst | *MethodHub Software Pvt. Ltd., Chennai, India* *Jan 2023 – Jul 2024*

- Automated ETL reporting workflows for finance, compliance, and operations teams — reducing manual reporting effort by 30% through scheduled Power BI refreshes and SQL-driven data pipelines.
- Developed and maintained Power BI KPI dashboards across 4+ departments using DAX measures and time intelligence functions, improving leadership visibility and enabling data-driven decision-making.
- Optimised 15+ complex SQL queries across datasets exceeding 1M rows — reducing average query execution time by 75% (from 7 seconds to under 2 seconds) through strategic indexing and query restructuring.
- Designed star schema data models in Power BI Service supporting consistent, high-performance business intelligence reporting across multiple business units.
- Performed rigorous data validation, cleansing, and reconciliation on business-critical financial datasets — ensuring 99%+ reporting accuracy and enabling confident stakeholder decision-making.
- Delivered ad-hoc analysis and translated complex business requirements into scalable data solutions, collaborating with cross-functional stakeholders in an Agile (Jira) environment.

Key Projects

Finance Analytics System — SQL Performance Optimisation GitHub

- Processed 1.4M+ sales records using advanced SQL across a layered revenue model (Gross, Pre-Invoice, Post-Invoice, Net Sales).
- Reduced query execution time by 75% (from 7 seconds to 1.9 seconds) through strategic indexing — replacing function-based filtering with an indexed fiscal year column.
- Applied window functions (DENSE_RANK, OVER) to rank markets and customers by revenue contribution, powering executive performance reviews.

Technologies: SQL, MySQL

Business Insights 360 — Enterprise BI Dashboard GitHub Live Dashboard

- Developed a cross-functional BI solution integrating Finance, Sales, Marketing, and Supply Chain KPIs into a single executive-facing dashboard.
- Designed a scalable star schema data model and built advanced DAX measures for profitability tracking, forecast accuracy, and year-on-year variance analysis.

Technologies: Power BI, DAX, Excel

Loan Risk Analytics Dashboard GitHub Live Dashboard

- Built a multi-page Power BI dashboard for a banking loan portfolio — tracking YoY loan growth, YTD loan amount, and default change metrics using time-intelligence DAX functions.
- Performed borrower segmentation by credit score, income, and demographics to identify high-risk segments and portfolio exposure trends.

Technologies: Power BI, DAX

Education

MSc Data and Computational Science *2024 – 2025*

University College Dublin, Ireland

Dissertation: Co-developed an AI Medical Report Analyser using a Retrieval-Augmented Generation (RAG) pipeline with LangChain and Gemini 1.5 Flash to simplify complex medical documents for patients.

B.Tech Computer Science (Data Science) *2020 – 2024*

Dr. M.G.R. University, India — Awarded Overall Best Project and Overall Best Student

Certifications

- **Google Data Analytics Professional Certificate** — Google / Coursera [Verify]
- **IBM Business Intelligence** — IBM Career Education Program [Verify]
- **IBM Big Data Engineer** — IBM Career Education Program [Verify]
