Stamp 1G (Eligible to work in Ireland)

PROFESSIONAL SUMMARY

Data Analyst with an MSc in Data & Computational Science from University College Dublin. Specializing in SQL analytics, Power BI dashboards, and data modelling. Proven ability to reduce manual reporting by 30%, improve query performance by 75%, and deliver cross-functional KPI solutions. Actively seeking Data Analyst roles in Ireland.

TECHNICAL SKILLS

SQL & Databases: SQL (CTEs, Window Functions, Query Optimization), MySQL, SQL Server, Snowflake, AWS S3
Business Intelligence: Power BI (DAX, Power Query), KPI Dashboards, Star Schema Data Modelling
Programming: Python (Pandas, NumPy, Matplotlib) | Excel (Pivot Tables, Power Query)
Data Engineering: ETL Workflows, Data Transformation, Automated Reporting, Data Validation, Data Visualization
Tools & Version Control: Git, GitHub
Certifications: Google Data Analytics Certificate — Google / Coursera

---

EXPERIENCE

Business Intelligence Intern (Virtual Program)
AtliQ Technologies (Remote) | Feb 2025 – Apr 2025

- Developed automated Power BI dashboards integrating Finance, Sales & Operations KPIs, reducing manual reporting by ~30%
- Designed star schema data models to standardize cross-functional reporting
- Built DAX measures for profitability and forecast analysis
- Translated business requirements into analytical dashboards for stakeholder

---

Data Analyst Intern
MethodHub Software Pvt. Ltd. | May 2024 – Aug 2024

- Designed and maintained ETL workflows consolidating multi-source datasets
- Built interactive Power BI dashboards for compliance and performance monitoring
- Automated recurring reports, reducing turnaround time and manual effort
- Executed data validation and quality checks to improve reporting reliability

---

SELECTED PROJECTS

Finance Analytics System – SQL Performance Optimization
GitHub: https://github.com/krithesh19/atliq-finance-analytics-sql

- Built end-to-end revenue reporting system processing 1.4M+ sales records
- Implemented layered Net Sales transformation (Gross → Pre-Invoice → Post-Invoice → Final Net Sales)
- Applied window functions (DENSE_RANK, OVER) to rank markets and customers by revenue contribution
- Optimized query performance by replacing function-based filtering with an indexed fiscal year column
- Reduced execution time from ~7–8 seconds to ~1.9 seconds (~75% improvement)

Business Insights 360 – Enterprise BI Dashboard (Live Dashboard Link)
GitHub: https://github.com/krithesh19/business-insights-360-powerbi

- Developed cross-functional BI solution integrating Finance, Sales, Marketing, and Supply Chain KPIs
- Designed scalable star schema data model for reporting efficiency
- Built advanced DAX measures for profitability and forecast accuracy tracking
- Delivered executive-level dashboards enabling structured performance monitoring

---

Loan Risk Analytics Dashboard (Live Dashboard Link)
GitHub: https://github.com/krithesh19/loan-risk-analytics-dashboard

- Built multi-page Power BI dashboard simulating banking loan portfolio monitoring
- Developed time-intelligence metrics (YOY Loan Growth, YOY Default Change, YTD Loan Amount)
- Applied borrower segmentation using credit score, income, and demographic analysis
- Enabled identification of high-risk segments and portfolio exposure trends

---

EDUCATION

- MSc Data & Computational Science | University College Dublin, Ireland | 2025
- B.Tech Computer Science (Data Science) | Dr. M.G.R. University, India | 2024
